

Submitter:

Laurie Caplan

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

Reproductive rights benefit men, women, children, the community, and the country. Without such protections, women die during pregnancy, childbirth, and immediately after; unwanted children are often neglected, abused, and killed; and adults can't plan their economic, work, and family's future.

I understand that some belief systems believe a woman's body should be controlled by men and/or the community. I wonder how people would react if legislation proposed to control a man's erections, insemination, and sexual partners. Ha!

Please treat all people, including women, with the dignity, courtesy, and respect you want for yourself. PLEASE SUPPORT HB 4088.

Thank you.
