House Committee On Judiciary

Measure, Appointment or Topic:

HB4145

We need gun reform - they are literal killing machines, it's high time access and use and ownership of them be better regulated and controlled. We need common-sense safeguards that work:

1. A permit to purchase - if we require a permit to drive a car, we should require one to own a gun.
2. Background checks - again, we are talking about machines meant to kill.
3. No one needs large capacity magazines except if they are planning a carnage.
