Nancy Graybeal

On Behalf Of:

Committee:

House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I oppose this bill. As a liberal Democrat, this bill ends up protecting practitioners of sex change procedures from oversight and accountability. It is the opposite of a science based, evidence based accountability. Above all, Democrats should be protecting children and not exposing them to dangerous medical procedures that drug and mutilate our kids. While almost every other country is moving to restrict these harmful procedures, we Democrats are doubling down. And now, to our everlasting shame, are wanting to hide the results. Please vote down this monstrous bill and once more become the party of evidence based medicine whose aim to protect, not harm, our children.
