House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I support HB4088 - healthcare professionals should be able to provide reproductive and gender-affirming care to their patients without fear of being prosecuted.

Reproductive Healthcare needs to remain confidential between the patient and their provider. The government has no business deciding what constitutes care for an individual. We have been making these decisions for ourselves for all of our lives - government has no business telling us what we can do with our own bodies.

Midwives have been providing reproductive services for many years - why are they not able to continue this practice now?? I strongly urge a YES vote on HB4088.
