

House Judiciary Committee in Oregon,

I have spent the last 4 years navigating an already complicated and convoluted healthcare system for my own lifesaving gender affirming care, that has often left me feeling hopeless. Even before this administration began its aggression against gender and reproductive healthcare, being able to locate and afford that care was a hurdle. Now with the federal government overreaching its areas of responsibility and inserting itself into our private lives through intimidation, that legal healthcare will become scarce. This bill is an essential step toward protecting Oregonian health care providers, personal healthcare records, and privacy rights. I can not express enough the lives this bill will be protecting, and ultimately saving. I implore you to vote YES on HB 4088. Thank you for your time and commitment to protecting the rights of all Oregonians. Liana Coffey
