House Committee On Judiciary

Measure, Appointment or Topic:

HB4088

I am writing today in strong support for HB 4088. My husband and I love living in Oregon. We choose to have our business and family in Oregon specifically because of the rights and protections of this state. Raising our two children here, it gives me peace of mind that their body autonomy will be respected as they grow from little children to adults and stress the need to protect those rights today. I personally receive gender affirming care and could not imagine living in a place where the government would be able to intervene for that care.
