

Submitter: Kyle Jorgensen

On Behalf Of:

Committee: House Committee On Judiciary

Measure, Appointment or Topic: HB4088

Access to gender affirming care has greatly improved the mental and emotional well being of many close friends of mine. On the basis of bodily autonomy, gender affirming care and reproductive healthcare should remain between patients and medical professionals, not the government. Protecting access to healthcare at the state level for the most vulnerable amongst us is vital for the wellbeing of our state and society. Oregon should make a stand for individual rights and bodily autonomy.
