Public Comment in Opposition to HB4088

I urge you to oppose this proposed legislation. There are many aspects which would be detrimental to the people of Oregon (and others) if it became part of Oregon law. I will limit my comment today to concerns related to "standards of care" as noted in the proposed bill.

I have no doubt of the desire to provide good health care to Oregonians. However, this term overlooks the fact that there is no evidence according to more than 12 systematic reviews of the medical evidence that the current "standards of care" provide health benefits to recipients.

Sincerely,  
Sherrie Taha  
Forest Grove, Oregon
