HB4085

This bill is outrageous - allowing autonomous vehicles to operate without a permit or license is a dangerous and reckless idea that is likely to have terrible consequences. There absolutely needs to be oversight and regulation of autonomous vehicles with the state of Oregon. I also think the municipalities should have the ability to regulate their use as the use of these vehicles in rural areas compared to a metropolitan or suburban area will be vastly different. There is also information out there that people in other countries are often remotely monitoring and operating these vehicles. They absolutely should have to have an Oregon license to be able to do this.
