Committee:

House Committee On Revenue

Measure, Appointment or Topic:

HB4134

I support this bill because it will help the natural resource in funding several programs and it doesn't put the pressure on on the agricultural community to support issues that are a state wide concern. The Ag community

Has many issue we face, but can not financially support them on their own when the are the result of legislative and government programs that did not have enough finacial support of the state to cover all the cost. Some of theses issue (like the wolf reintroduction and now the high depredation cost) can not be expected to fall on the ag community alone. These are Oregon mandates and the people of oregon need to help. The funding coming from the transient lodging tax will meet the need and spread out the cost through Oregon and those coming to Oregon.

Thank you for supporting this bill and all of the natural resource entities that will benefit from this bill.
