

Submitter: Aaron Boyle  
On Behalf Of:  
Committee: Senate Committee On Early Childhood and Behavioral Health  
Measure, Appointment or SB1573  
Topic:

This bill is insidiously selling itself as a measure to protect children, when the truly intended effect is to dismantle harm reduction efforts in our communities. I have personally lost friends to things like overdoses, and I know firsthand how valuable these services are to keeping our neighbors alive.

Measures like this don't serve to protect children in any way, and if anything put them more at risk through the unintended downstream effects they create. We need more foresight in our laws, and less knee jerk reactions to scary sounding issues.

Respectfully yours
