House Committee On Judiciary

Measure, Appointment or Topic:

HB4114

After witnessing the blatant disregard for the Constitution and the laws of this country by ice agents/the department of Homeland security/immigration/whatever you want to call them, citizens need hb4114. It's honestly not much in the grand scheme of things, but it is something.

No citizen or occupant of this country, the United States of America, should have to live in fear that their home might be unlawfully and violently broken into without a judicial warrant. That is a violation of our Fourth amendment rights while agents refuse to give any identification, and stealing our personal effects. It makes me sick to think about that happening in this country where I honestly never thought anything like this would be happening. I support HB4114.
