

Submitter: Chal McCollough  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure, Appointment or Topic: SB1538

SB1538 is part of the SUGaR (Socialist Urban Great Replacement) Tribe Insurrection that will cause a civil war and must be voted down. Oregon Democrats have been radicalized into insurrectionist insurgents. Democrats aborted their children, so the birthrate in Eugene is only one birth per woman. Democrats falsely accuse others of being racist to virtue signal to their voter base. Democrats shifted the Overton window to make it unacceptable to talk about the Great Replacement, then they opened the borders and instigated Sanctuary City policies so they can import the third world and give them welfare, food stamps, & free healthcare so their children and the white women vote blue no matter who. It's illegal, it's corrupt, and it's costing us billions per year, \$700M per year in OHP for illegals alone, who knows how much OHP is spending on sex changes for minors without parental consent.

The migrants congregate in big cities, and they jack up the price of rent sky high. Only 2% more home buyers can raise the price of homes 10-15%, so when 1/3 of Democrat run big cities are foreigners, we can't afford to live in our own cities, people can't move out, so they're dependent on welfare. You can't just take our tax money and use it to flood our cities with the third-world. We are the Original Americans. These are our cities. I want to be able to afford to live in them so you must follow the law and deport all migrants.

I am the author of FreeLawGen, and AI generated lawsuit & legal document generator. I'm currently suing Portland State University for \$2.35M under the Oregon Tort Claims Act and Section 1984, it's in the Ninth Circuit right now, and the Court is about to ban Preponderance of Evidence to take Certain Rights under the Ninth Amendment, and ending Fictional Eleventh Amendment Qualified Immunity. I'm speaking with the Principle of Churchill High School currently in a lawsuit negotiation over anti-white racism that my son and I have experienced. I can run Court simulations on supercomputers for dollars. I use a powerful vibe coding technique using markdown to create rock solid cases, timelines, evidence lockers, and everything I need for Court. I'm going to sue the shit out of you for this. We have an AI online legal campaign generator to raise funds to sue with, and it creates advertisements and SEO.

You need to follow the law as written. You can't just make an administrative State outside the APA rules, and use arbitrary State power like ORS 352.087 to give all the University procedures "force of law" then fine me \$20 for my protected free speech. I'm just going to take you to Federal Court and put the smack down and make you give me \$millions. Likewise, you cannot highjack our State to use for your stupid

SUGaR (Socialist Urban Great Replacement) Tribe Insurrection. We're also suing Wikipedia for defaming us as far-right for looking at stats and concluding Democrats are actually trying to replace the w3hite people. I'm an AI scientist, I use data. I can see the birthrates. We see that 1/3 oof LA, San Francisco, & NYC are foreigners, and that Democrats are trying to buy votes by harboring illegal aliens.

You're dealing with people way smarter than you. You're an insane naked emperor walking around thinking you're invisible and we can't see you. Everyone around can see y'all are DEI Boomer Karen lunatics. Everyone at your protests are either old white libs or your non-whites. It's pretty obvious when all of your kids are gone.

You need to act in the best interests of the Original Americans. We are akin to Native Americans. Every times I go to a meeting at U of O or 4J Public School Board Meeting the woke white liberals apologize for being on stolen land. Y'all are like fish, you don't notice you're in water. It's perfectly normal for y'all to chop your children genitals off, abort your kids, and replace your own race because in the city, that is your voter base. Outside the city, everyone thinks you're lunatics.
