

Submitter:

Richard Barnhart

On Behalf Of:

Committee:

House Committee On Climate, Energy, and Environment

Measure, Appointment or
Topic:

HB4080

HB 4080 is a common sense bill that will help Oregonians with the affordability of their electricity bills. It would allow users to generate their own electricity without larger rooftop systems. Plug-in solar has been popular in Europe for years and recently passed in Utah with bipartisan support.

I urge you to pass HB 40480
