Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or HB4080
Topic:

Please listen to the electricians and firefighters and fire marshals. This technology is not ready to safely be used by consumers. It is especially dangerous to allow this in older buildings and not to develop codes for proper installation. At the least, the owner of the property should be allowed to ban these devices. If the owner cannot ban the devices and damage occurs, the State will be open to lawsuits. Please table this proposal until the safety issues are addressed.
