Committee: House Committee On Transportation

Measure, Appointment or Topic: HB4007

I support the change proposed in this bill to lower the age for children to be able to ride Class 1 e-bikes to 14. High school aged kids should be able to transport themselves where they would like to go without the need of a parent. eBikes are an extremely popular transportation method with growing popularity and we need to embrace that as well as allow people transportation choices that are not personal vehicles.
