

Members of the House Judiciary Committee,

I write to you in support of HB 4114.

At this moment in which our democracy is being actively threatened by unaccountable violent federal agents who are terrorizing US citizens and non-citizens alike, HB 4114 is a necessary measure to resist this form of federal lawlessness.

I support SB 4114 for the following reasons:

1. **Protection of Individual Rights:** The bill safeguards individuals' privacy and property rights by requiring law enforcement agents to obtain warrants and comply with identification and notification requirements before conducting operations.
2. **Accountability for Law Enforcement:** By creating a civil cause of action, the bill holds federal and out-of-state law enforcement agents accountable for violations, ensuring they adhere to legal standards and respect citizens' rights.
3. **Transparency in Law Enforcement Operations:** The notification requirements promote transparency by ensuring that state and local authorities are informed of planned operations, allowing for better coordination and oversight.
4. **Protection of Vulnerable Populations:** The bill provides additional protections for sensitive locations and vulnerable individuals, such as minors, seniors, pregnant individuals, and those with disabilities or serious medical conditions.
5. **Prevention of Unauthorized Operations:** By prohibiting state and local law enforcement from coordinating with agencies that fail to meet the bill's requirements, it prevents unauthorized or potentially harmful operations within the state.

Please join the many people in the US who are making history by resisting the frightening overreach by federal agents and federal agencies. This is a moment to defend our Constitutional and civil rights. Please vote for HB 4114.

Sincerely,

Roscoe Caron  
Eugene
