Committee:

Senate Committee On Early Childhood and
Behavioral Health

Measure, Appointment or

SB1573

Topic:

This bill is not about banning outreach or denying medical access as some opponents purport. We're in the throes of a fentanyl crisis, and this piece of legislation is a step to start to address that.

SB 1573 is about one narrow, common-sense guardrail: keeping bulk needle distribution out of school zones and similarly sensitive places, so community members aren't left dealing with the fallout. We need accountability right now.
