Measure, Appointment or HB4080
Topic:

We need clean energy! I support "balcony" solar because it's easy to use! Many European countries have used it safely for years, and Utah passed their bill last year approving it. I live in 1/2 duplex in an HOA complex. The HOA isn't going to install rooftop solar--it's too expensive. With balcony solar, I could buy it myself, and place it on my back patio. It's reasonably priced and portable! I can afford it, most people could! Please support it so we can reduce our electric bills.
