On Behalf Of:	Myself
Committee:	House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic:	HB4080

This bill is a way to allow thousands of Oregonians to save money and actually participate in the clean energy revolution. Even though we own our home and could afford rooftop solar, our house is located on a lot with tall Western Ponderosa Pines and rooftop is not feasible. However, we have a 20 foot section of exterior wall on the south side which gets excellent sun for at least 6 hours. This is where we would place plug in panels and reap energy savings. This bill would also allow tenants a chance to save on electricity costs.

Please support this common sense bill and help many struggling Oregonians lower their electricity bills while helping Oregon meet emission reduction goals.

Thank you,
Carolyn Partridge
