

Submitter: Britney VanCitters  
On Behalf Of:  
Committee: Senate Committee On Natural Resources and Wildfire  
Measure, Appointment or SB1541  
Topic:

Dear Chair Golden, Vice-chair Nash, and Members of the Committee,

A simple value we all learned as children is: when you make a mess, you should clean it up. That's why I support the creation of the Climate Resilience Superfund, to hold polluters accountable by making the large, out-of-state fossil fuel companies pay their fair share.

From wildfires to polluted water, we've watched as communities across the state have felt the worst of our climate crisis. For too long, the cost of cleaning up the impacts of climate change has been the responsibility of us Oregonians and our local governments. We've been footing the bill while fossil fuel companies rake in the profits. That must end.

To make things worse, these fossil fuel companies knew how harmful their pollution was. And not only did they cover it up, they successfully convinced everyday consumers that it was our fault and our problem to fix. We know better now. When you know better, you do better. As legislators, you have the power to end this corporate welfare and shift the costs from your constituents to these mega corporations.

I urge you to pass SB 1541 and finally make these polluters pay for the damage they've done to communities across our state.

Thank you,
