

Submitter:	Joan Kleban
On Behalf Of:	myself and my family
Committee:	House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic:	HB4080

I strongly support this bill to allow portable, affordable photovoltaic energy devices for Oregon residents. This technology has been widely used in Europe and has proven records as backup energy that is environmentally safe in households.

We humans need to move away from polluting fossil fuel energy dependence that is destroying our global climate. Affordable Photovoltaic Technology will add support with an important move toward the clean energy shift we need.

Please vote for this legislation as a step that enables more Oregonians to contribute to the clean future.

Thank you for your consideration about making climate solutions more available to constituents.
