HB4155

My partner and I were both working when we found out we would need IVF to have a child and neither of our insurances covered IVF. We were lucky enough to be able to afford to pay out of pocket for it and our child was born a few years ago. Our current health insurance also does not cover IVF and we cannot afford to pay for another round. I am now over 35 so my window to carry and conceive a healthy child is shrinking. Please require health insurers to cover fertility services so we, and many other Oregonians, may have an opportunity to expend our family. Thank you.
