House Committee On Judiciary

Measure, Appointment or Topic:

HB4114

As we watch our rights being ignored or even revoked at the federal level, I implore Oregon lawmakers to continue to set the example of a state that values its residents' freedoms and rights. Oregon has been one of the states at the forefront of this onslaught, but it has also courageously fought back using its existing legal framework. However, now is the time to create new laws that will ensure Oregonians are safe, that ALL Oregonians are safe, not only from unjust incarceration and the actions of federal agents themselves, but also from the tangible damage these agents are inflicting on the members of our community and their property.

What is happening across the country is terrifying, but hopefully the passage of this bill will bring relief and a semblance of safety to our most vulnerable population. Please vote in favor of HB 4114 in the 2026 session, and please reject the proposed amendments 2 and 3.
