House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic:

HB4080

Dear Members of the House Committee on Climate, Energy, and Environment.

Thank you for your service and the opportunity to testify on HB 4080. My home was built in 1927, and although I have investigated solar panels for my roof, they are not practical for my home due to large trees and shade. As we deal with the climate crisis, “balcony solar” for non-roof areas makes so much sense for renters and homeowners like me. Reducing code and other barriers to balcony solar installation is a smart move for our state.

Please vote for HB 4080.

Gratefully,

Denise Jessup
