Committee: Joint Committee On Information Management and  
Technology  
Measure, Appointment or HB4054  
Topic:

The current system is an uneven playing field. While insurance companies use deep pockets and advanced AI to find new ways to deny or reduce reimbursements, our clinic is forced to "play the game". This 'administrative tax' is unsustainable. HB 4054 ensures that as technology evolves, the rights of providers and the sanctity of the patient-physician relationship are protected from automated exploitation. We simply ask for a fair process where payment matches the complexity of care delivered.

I respectfully urge your support for HB 4054. Thank you.
