

Submitter:

Felicia Kongable

On Behalf Of:

Committee:

House Committee On Climate, Energy, and Environment

Measure, Appointment or
Topic:

HB4080

Please vote HB 4080 out of committee. It will not affect the State's budget.

This is an important bill that would make clean, locally produced solar energy available to a much greater number of Oregonians without the need for investment in increased transmission lines, etc.

After the bill passes, the equipment must still be UL certified, with the capability to shut down in the event of a power outage so they are safe for power line workers.

But we must pass the bill to move to that step! Please support HB 4080!

Thank you, Felicia Kongable
