HB4134

I support the above bill because it will ensure stable funding for wildlife and conservation in our state. The people who will pay this tax come to Oregon to take advantage of the natural wonders we have here. In order to avoid the "love a place to death" our state needs a fund to continue to steward the natural environment in Oregon. This bill also affords young people a way to become stewards of the lands and waters in Oregon through the workforce program that has been so successful. The bill has bi-partisan support and the support of the citizens of the state. Oregon has among the lowest tax rates on tourist accommodations. Let's pass this bill to keep Oregon green!
