

Submitter: Gregg Servheen  
On Behalf Of:  
Committee: House Committee On Revenue  
Measure, Appointment or Topic: HB4134

Hi,

I am long time resident of the state of Idaho. And a frequent visitor to eastern Oregon's public lands and deserts. I am writing in support of HB 4134 because it would provide funding through taxes that I might pay when I visit Oregon for the conservation and management of Oregon's species of greatest conservation need and its most vulnerable fish, wildlife, and habitats.

It is vitally important Oregon do more to protect and conserve the fish and wildlife species that inhabit eastern Oregon. These wildlife and the habitats they require are not only important to maintain as a long term public trust. But also because they attract people like me to Oregon. It is such Oregon resources, public lands, and fish and wildlife that bring my support of HB 4134 and its potential to increase my costs of visiting Oregon. I strongly support paying more to visit Oregon knowing that my money would go to conserving and managing all its fish and wildlife that I highly value and seek out.

Thank you for your state leadership. It is important the state be taking the lead to preserve and conserve Oregon's natural resources. Doing so will not only promote passing on these public trust and legacy resources to Oregon's future generations, but HF 4134 will help maintain Oregon as a destination to be visited. And will help support thriving economies in eastern Oregon.

Thank you for your leadership and attention to this important matter.
