

To chair Nathanson vice chair Reschke and
waiters, and members of the committee.

Bennett Lembo, Sunnyside Environmental School
2/6/2026

Dear chair Nathanson and members of the
committee. (Writing as a dog)

Hi, I'm a life long Oregonian resident
that just so happens to have 4 legs and a
snout. My name is Archer Sterling Lembo, and
I am writing to tell you to pass HB-4134-1.

The best part of any day is my walk,
this is the time I get to go back to my roots,
and explore the world around me.

Without the parks and environment the way
they are, I wouldn't be who I am today.
Chasing squirrels and checking Pmail is a part
of my identity. In all honesty it is a very
important part of dog nature, to play and be in
a forest. This bill won't just impact humans but
also their pets.

Oregon's wildlife is essential for the health
of our furry friends. It is in their nature to
run and chase and be part of the parks.

As a dog owner I know this and go
on walks regularly, and am commelly met
with little critters and a lively ecosystem. With
the pass of HB-4134-1 Oregon department of
fish and wildlife will have \$40million of
resources to improve the life of every species
in our ecosystem. The ecosystem in question
effects everything every animal that lives in
Oregon even your dog.

Sincerely, Bennett Lembo
