Committee:

House Committee On Transportation

Measure, Appointment or Topic:

HB4085

Please do not vote in favor of this bill. Doing so would increase the effect of moving us into a monitored police state. It would allow automated vehicles with cameras to prowl our neighborhoods and record everything we do without our knowledge or consent of who is recording or how that data will be used. This can be abused by bad actors like ICE to target and harass citizens just trying to live their lives. First Flock cameras and Palantir and now this? Where does it end? Where is the line drawn for respecting the privacy of citizens to just exist without fear of being monitored or preyed upon by those they may disagree with or criticize? I urge you all to oppose this bill, as it moves us another step into a technofascist autocracy, something that doesn't just happen overnight, but creeps in little by little in steps like this bill is taking. Don't let automated cameras start prowling our neighborhoods. Instead, regulate them. Protect your constituents, not special interests.
