

Submitter: Chad Campbell

On Behalf Of:

Committee: Senate Committee On Early Childhood and
Behavioral Health

Measure, Appointment or Topic: SB1573

I reside in Jackson County and serve the lower half of Oregon, assisting community members in accessing lifesaving care. Harm reduction is healthcare, and it is needed in all Oregon communities to continue providing essential services to those in need. Harm reduction programs support both community members and public spaces by providing access to and proper collection of supplies, helping prevent these items from being left in communal areas. This bill would limit access to these critical services and create a negative impact across Oregon communities. Please oppose this bill.
