

Submitter:	Deborah Carey
On Behalf Of:	Corvallis Sustainability coalition
Committee:	Senate Committee On Transportation
Measure, Appointment or Topic:	SB1542

Here's a way to create a transparent performance-based process to measure Oregon Department of Transportation (ODOT) projects, so they are investments that meet long-term goals.

Meet State goals for safety, maintenance, congestion, climate impact, and cost effectiveness will be codified.

Newly proposed projects will be scored on how they serve those goals.

Project funding priorities will be based on these goals. And if goals are not met, future project priorities will be adjusted, with a focus on maintenance and safety.

ODOT will publish an annual report card to ensure transparency about meeting goals and identifying steps to improve outcomes. Clear and transparency to connect these projects to Oregon's vision! What a great way to see how we've done!
