Hello,

I just read the proposed legislation to create another climate tax on us Oregonians. Please explain how taxing the energy businesses in Oregon will have any effect on the climate.

So far all of the so called climate actions by the states on the west coast has done almost nothing except raise the cost of utilities and fuel for the residents of these states. Nothing, read the reports.

You all are just caught up in your far left climate agenda.

Take a step back and just listen to the businesses and residents. This type of legislation kills jobs and punishes people.

No from Eastern Oregon
