

Submitter:

Marika Straw

On Behalf Of:

Committee:

Senate Committee On Early Childhood and  
Behavioral Health

Measure, Appointment or

SB1573

Topic:

I trust the public health workers who say that this bill is a bad idea. I echo their criticism - that this will lead to MORE syringe litter, not less, and that what works is going to be different in each community. I also live rurally and don't want to further impede access to these lifesaving services to rural residents. Thank you.
