As a home owner in fire adapted oak savanna we are increasingly concerned about the risks of uncontrolled catastrophic fire and the need to use controlled/ecological/indigenous cultural burns to reduce fire risk. We do what we can to address 'home hardening' and connect with neighbors to create a firewise neighborhood. But recognize so much more needs to be done to support fire fighters on the ground as we adapt to longer, hotter, drier fire seasons in the years ahead.

This is a bi partisan issue.

Thank you
