

Submitter: Patrick Finch
On Behalf Of:
Committee: Senate Committee On Early Childhood and Behavioral Health
Measure, Appointment or SB1573
Topic:

As a community member with the main concern of protecting our community, especially children, I respectfully, but strongly, oppose Senate Bill 1573. The harm reduction being done in our community is saving lives more than harming them. It is incredibly important that non-profits focused on harm reduction continue to receive funding in order to continue to help and care for the communities they are in. If I am frank, it does not make sense to discontinue funding for a system that is designed to keep our community spaces cleaner and safer.
