

Submitter:

Phyllis Weih

On Behalf Of:

Committee:

House Committee On Climate, Energy, and
Environment

Measure, Appointment or
Topic:

HB4080

The US is falling behind in our solar generation of power. China is pulling ahead; and even though I don't think of it as a competition, their actions show what can be done to make us more energy independent and to help stop global warming. I want to hear testimony on this bill in the hopes that it passes. Thank you for considering my thoughts. Sincerely,

Phyllis Weih
