

Submitter: James Fereday  
On Behalf Of:  
Committee: Senate Committee On Natural Resources and Wildfire  
Measure, Appointment or SB1541  
Topic:

Please support SB 1541 for a legacy of positive adaptation to climate change's worst effects and the major contributors to the rapidly warming planet. Our household has worked tirelessly to reduce our carbon footprint, but feel that it is a drop in the bucket compared to fossil fuel industry's continued promotion of gas, oil, and coal. We pay for it, even when we spend our earnings to reduce our impact. One fire, it's all gone. We used to think smoking was OK to do, even healthy. After science pointed out the facts, it took decades of tobacco companies' denial before it is a highly taxed and behaviors changed. The fossil fuels are in the same dilemma as the tobacco companies.

Do the right thing. If not now, when,

Jamie Fereday
