Committee:

House Committee On Transportation

Measure, Appointment or Topic:

HB4085

I find the prevalence of automated vehicles and the programs that are used in cars disturbing after their long records of being unsafe. I also find it worrying that this body would preempt local governments from being able to regulate these dangerous machines. And I am highly worried that these machines and the companies that use them will start collecting data and denying people their right to privacy by surveilling them at all times they are nearby. I ask that you all oppose this law because it gives too much freedom to these machines, the corporations and hostile federal governments to violate the civil rights that all in Oregon have a right to. And at the same time it does this it kneecaps local authorities from holding these organizations to account for any such violations.
