

Submitter: Matthew Villers

On Behalf Of:

Committee: House Committee On Transportation

Measure, Appointment or Topic: HB4085

You know this would never pass in Portland, so you're trying to supersede the will of the people at the state level. That is unacceptable and anyone trying to push this should be ashamed.

Autonomous Vehicles are a security risk, entrench car dependency, and serve only to enrich silicon valley while harming and impoverishing our communities. Less cars and more investment in alternatives is the only way we make our cities safer and healthier.

Please vote NO on this and let us keep robotaxis OUT of Portland. They do not belong here and will bring far more harm than good.
