Sally Hollemon

On Behalf Of:

Committee:

House Committee On Climate, Energy, and Environment

Measure, Appointment or  
Topic:

HB4046

I oppose HB 4046 because the bill doesn't require a variety of interests to participate in the proposed study. A real study would include experts on water, air, waste disposal and more. Also, the bill should require government funding, not leave open the possibility of the nuclear energy industry funding a study that doesn't look at risks to Oregon's land and residents. Please oppose HB 4046.
