

Written Testimony – Oppose SB 1599

I submit this testimony in opposition to **SB 1599**. Voters signed referendum petitions with the understanding that this issue would be decided during a November general election. SB 1599 changes that expectation after the fact. Regardless of policy preferences, the referendum process should maximize voter participation and maintain public trust. Moving this vote to a lower-turnout election does neither. I urge you to reject SB 1599.
