

I oppose moving the date of the people's decision to take this legislative corruption to May. The people of Oregon have spoken, and the legislature must listen and do what the people have made clear their reasons for this action.

The State of Oregon must start realizing they have a spending problem. The public unions keep pushing for more taxes to secure pay increases and PERS for their members while the people who pay their wages and benefits are finding loss of jobs, less pay increases and higher taxes.

Oregon leaders must start serving legal Oregon residents and cut back on the social programs that support the people that do not work or pay taxes. The Oregon elected leaders must start listening to the rural residents of this state not just the NGO, illegal migrants and homeless advocates.

You can't tax your way out of the rampart out of control spending. More residents that pay taxes and business will leave this state just to survive the problems caused by **Your Governor**.
