Measure, Appointment or SB1599  
Topic:

I urge you to reconsider any action that would change the scheduled timing of a voter-initiated measure. More than 200,000 individuals supported placing this measure on the ballot at its originally intended date and altering that timeline may be viewed as inconsistent with the expectations of those voters. Many constituents value accountability and transparency in the legislative process, and changes to the timing of a referendum can raise concerns about whether their participation is being fully respected. Maintaining the originally scheduled date can help ensure that public involvement and trust are preserved. Thank you for your attention to this matter and for considering the perspective of the voters who engaged in this process. I urge you to vote NO on SB1599
