Senate Committee On Health Care

Measure, Appointment or Topic:

SB1598

Dear legislators.

I strongly oppose the idea of blanket prescriptions or medical orders issued by unelected bureaucrats to wide categories of population. Medical treatment is individual. Every person reacts to medications differently. Medications beneficial to one person may kill another. Decisions to receive or decline any medication or medical procedure belongs to the individuals and their personal doctors, not to government bureaucrats.

There is no emergency prompting this legislation. Stop the government over-reach and abuse of power.

Sincerely,

Arkady Grudzinsky
