

Submitter: Rachel Najjar

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: SB1598

Not only do I strongly oppose SB 1598, I reject it and ask that you remind yourselves that you are not immune to the law. Why would you want someone else making decisions for your body and family? Especially someone with no medical training or understanding of the human body. This is a human rights violation and has no place in our state. Human rights are not legislated or dictated by our laws. God-given rights are human rights and can not and never will be revoked by man-made laws or taken away by elected officials nor lobbyists who seek to take away these rights.

With my background in public health, I have no right making medical decisions for anyone except for myself and my family. The focus of public health should be ensuring that everyone has access to basic human rights such as food, shelter, clean water and support.

The thought of someone with no regard for myself or my family, not to mention medical education, deciding mandatory medical treatment is dispicable. In regards to vaccinations, it is simple. Read the package insert before you decide to inject yourself with anything. It is every persons right and responsiiblity to make their own informed choice on this matter. There is no compensation when there is an injury or death, there is no help. Public health officials should focus on helping the people that have been injured by the COVID vaccine and the previous CDC childhood vaccine schdule, not trying to take more power to force more injuries!
