| On Behalf Of: | My friend in Oregon |
| Committee: | Senate Committee On Health Care |
| Measure, Appointment or Topic: | SB1598 |

Hello I have several friends that live in Oregon thst are immunocompromised or are battling cancer. They need the protection of their community, and to do that, their community needs access to vaccines for among other things covid and Flu. Last year was a real miss in Oregon and this legislation is a great example of outting in the work to get it right the next time. I want my friends that live in your beautiful state to have access to care and community.
