

SB1598 is the opposite of freedom in the freest country on Earth. What happened to “My body, my choice”? Does that only apply in the case of abortions? Medical interventions should never be mandated as we humans are not clones. What works and is helpful to one person could easily cause harm in another. This bill is a complete over-reach of government authority. My health and what I do to sustain and improve it should be between myself and my doctor. Period. Full stop.

I support Medical Freedom in Oregon and the USA. I support legislators who recognize our intrinsic right to determine what we put into our bodies. This bill needs to be rejected as strongly as humanly possible.

Please kill this bill.
