Measure, Appointment or Topic:

SB1598

As a retired medical doctor, I urge you to allow parents to make their own choices regarding their children's health. As a pediatrician, I saw first hand the damage done to our children by early vaccinations. It is heartbreaking and I strongly urge you all to watch the Vaxxed movies, in order to understand that heartbreak.

The ingredients in vaccines are toxic to the human body and are not required for healthy children. Why does America rank last among 10 high-income countries in overall health system performance, according to a September 2024 report by the Commonwealth Fund? Because we over vaccinate our nation's children. Period.

Remember, My body, My choice. That rings more true here than anywhere else.
